

SECTION 2 - FACTSHEET 1

SURREY CHILDREN'S SERVICE

The Creation of the Surrey Children's Service from September 2002 brought together all education and social services activities centred on those children who have additional needs or who are vulnerable. The service works with families, schools and other services to enable children to have a better life.

Our vision is to provide co-ordinated services through local teams. These should be responsive to the needs of children, families and schools and integrate referral and response through harnessing individual professional skill and expertise. We aim to develop a service which progressively shifts the balance of our work to prevention through early identification and intervention.
